

# Director, Clinical Project Management

**Ref: PSL4072**

London, UK

**Attractive Salary**

Commensurate with experience

**A unique opportunity to join a truly innovative and ambitious organisation; combining the very best of ground breaking academic and clinical research.**

**Are you ready to join a young, dynamic leadership team?**

**Do you have the drive, enthusiasm and talent to make a difference?**

**Are you experienced and capable of leading diverse clinical programmes?**

**Would you enjoy contributing to the Company's vision, strategy and approach?**

Our client offers a unique business opportunity and environment for drug development. With £15.5M seed funding and €11.5M European Commission grants already secured, they are committed to developing a number of novel therapeutic solutions.

Utilising their core expertise and understanding of blood flow, the company is advancing five discovery and drug development programmes that bring exciting innovation to areas of high unmet medical need. These include therapies targeting foetal conditions, heart disease and cancer, amongst others.

Reporting to the CEO, this newly created role will be critical within the next stage of these programmes and the company's evolution, as the business moves into clinical development.

The **Director, Clinical Project Management** will enjoy tremendous scope, variety and challenge, including:

Cross functional management, implementation and performance of all clinical programmes

Responsibility for the deliverables, performance and commitment of CRO and other partners

Ensuring all clinical programmes are performed according to Protocol and Project Management plans

Full responsibility for all clinical trial programmes – financially and scientifically

The **Director, Clinical Project Management** will be expected to possess outstanding:

Verbal and written communication skills

Ability to manage complex situations calmly and with sensitivity

Leadership skills

Honesty and integrity at all times

Focus on resolving problems and identifying creative solutions

Ability to juggle multiple projects, prioritising as required

Attention to detail whilst maintaining focus on the bigger picture, as appropriate

This is an outstanding opportunity to play a lead role within the development of an innovative, growing and unique business. Their "spin-in" model combined with a Research Collaboration agreement allows the operational and R&D teams to be located within a globally recognised university Division of Medicine. This allows leading global experts and clinicians to work closely with the outstanding management team to take academic, commercial and clinical lead on projects.

**A truly unique environment in which to achieve success.**
