

Senior Engagement Consultant, UK

Ref: PSL4078

Attractive Salary Package
Commensurate with experience

Play a key role in the adoption, delivery and development of the most advanced technology tools and solutions to improve the efficiency of clinical trials.

This is an exciting opportunity to join a highly successful business and **Leader in Clinical Technology**, helping life science clients to make their clinical trial process more efficient, productive and of higher quality.

Reporting to the Principal, Consulting Services you will play a crucial role in the continued strategic development and direction of the business, delivering quality solutions and enhancing your and the company's **Subject Matter Expertise**.

You will have responsibility for designing, developing and delivering focused consulting services to drive transformational change and real-world value for your customers.

Our client has over 15 years' experience successfully providing unique technology and consulting services within:

-  Study Planning
-  Site Initiation
-  Patient Engagement
-  Study Conduct
-  Analytics & Benchmarks

Their products and solutions have delivered over 9,000 clinical trials in over 130 countries to date.

With an unenviable reputation for delivering innovation and quality solutions of the highest standard, the business continues to grow, with an excellent mix of new clients and repeat business, driving the requirement for additional experienced engagement consultants.

You will be joining a unique culture; dynamic, innovative, ambitious, collegiate, and one that encourages a partnership approach and rewards both innovation and quality. You will bring **Subject Matter Expertise** within clinical operations and development, with outstanding communication skills and a desire to build strong relationships internally and with clients.

You will need to have domain expertise within **Clinical Trials / R&D** and a desire to pursue personal, professional and company development. As well as contributing to client delivery projects, you will be expected to take a lead in the development of new service offerings and thought leadership initiatives.

Do you have the ability to influence, to lead others and to share your experience and knowledge, whilst always seeking to improve your own expertise and consulting reputation?
