

Head of Non-Clinical Safety, Immunology

Ref: PSL4126
UK

Attractive Salary
Commensurate with experience

This is a rare and exciting opportunity to play a key role in the vision and strategy of an innovative BioPharmaceutical Company, focused on making a positive impact on patients' lives.

Our client brings a patient-centric approach towards drug development; always focusing on how they can make a difference to the lives of people living with severe diseases so that they can enjoy normal lives every day

We are seeking an experienced **Head of Non-Clinical Safety, Immunology** capable of providing **leadership, direction** and **vision**, with the aptitude and ambition to drive operational excellence in a growing **Non-Clinical Safety Group** within Development Sciences.

You will possess a **strategic** approach and vision, coupled to a strong scientific background, can-do attitude, and the ability to **lead** and **inspire** others. You will be expected to be **decisive** whilst delivering science of the highest **quality**. You will bring outstanding experience:

- Leading and driving the development of an outstanding and growing **Non-Clinical Safety Group**.
- Developing the strategic direction of **Non-Clinical Safety** to ensure the continual evolution of the science and technology to deliver key scientific data to project teams.
- As a subject matter expert within **Immuno-Toxicology**.
- Developing a broad range of drug candidates – small and **large molecules** as well as emerging technologies such as cell and gene therapy from discovery into early development / POC / FIM.
- Providing the strategic leadership for late stage/post marketing from a non-clinical safety perspective.
- Leading the establishment of collaborations and partnerships with academia and industry.
- Maintaining an awareness of new / emerging techniques and tools relevant to the field to ensure the group remains state of the art.

The **Head of Non-Clinical Safety, Immunology** will play a key role in Development Sciences, creating a strong and quality focused team of outstanding scientists to play a key role within global multidisciplinary project teams.

The **Head of Non-Clinical Safety, Immunology** will bring specific Immuno-Toxicology expertise having contributed to all aspects of the product development life cycle, ideally on an international basis. You will possess outstanding verbal and written communication skills and the confidence to present at meetings with regulatory authorities. You will have excellent technical understanding coupled to the ability to provide strategic vision and inspire others.

As **Head of Non-Clinical Safety, Immunology** you will enjoy a high level of autonomy and influence, within an outwardly facing role, working with stakeholders across the entire business, with the opportunity to influence throughout the matrix organisation at a senior level. You should be pro-active, able to inspire others, with the desire and ambition to add value and make a difference within **Development Sciences** and ultimately to patients.

You will have the opportunity to shape your own future, in keeping with the company philosophy and approach.

Small enough to be reactive and nimble, large enough to make a difference.

Creating value for people living with severe diseases in immunology and neurology
